

FOOD SHARE

(TO SUPPLY LEFTOVER FOOD TO POOR)

By

Bandari Suresh

2111CS010606@mallareddyuniversity.ac.in

PROJECT ABSTRACT

Food waste is a significant issue worldwide, with tons of food being discarded daily while many people suffer from hunger. This project aims to develop a Salesforce-based solution to streamline the process of collecting and distributing leftover food to those in need. By leveraging the capabilities of Salesforce, we can efficiently manage the logistics, ensure food safety, and maximize the impact of food donations.

This project will minimize food waste by redirecting surplus food to the poor, ensuring timely and efficient distribution. It will also enhance transparency through real-time tracking and reporting of food donations and distributions. Additionally, the project will engage volunteers and donors, facilitating their involvement in the food redistribution process.

The methodology involves integrating Salesforce CRM to create a centralized system for managing food donations, donors, volunteers, and beneficiaries. A portal will be developed for food establishments to register and report surplus food. Volunteers will be coordinated through a registration and assignment module to ensure efficient food pick-up and delivery. A system will be implemented for identifying and registering individuals and communities in need of food assistance. Logistics management will be optimized using Salesforce's capabilities, and real-time tracking will be enabled through Salesforce's reporting and dashboard features. A feedback mechanism will be incorporated to continuously improve the process.

Expected outcomes include a significant reduction in food waste from participating establishments, improved food access for needy individuals and communities, higher participation rates from volunteers and donors, and clear and transparent reporting of all activities related to food collection and distribution. This Salesforce based project addresses the dual issues of food waste and hunger by creating an efficient system for redistributing leftover food. By leveraging Salesforce's robust features, the project aims to create a sustainable and scalable solution that can be adopted by communities worldwide.

INTRODUCTION

Food waste is a growing concern globally, with an alarming amount of edible food being discarded daily while millions of people suffer from hunger and food insecurity. This paradox highlights the need for innovative solutions to bridge the gap between surplus food and those in need. The project "Supply Leftover Food to the Poor" aims to address this issue by leveraging the powerful capabilities of Salesforce to create a streamlined, efficient, and scalable system for collecting, managing, and distributing leftover food.

The core idea is to develop a centralized platform where restaurants, cafes, and other food establishments can easily report their surplus food. Volunteers can then be coordinated to collect and deliver this food to registered beneficiaries, ensuring that the food reaches those in need promptly and safely. By using Salesforce's CRM tools, we can enhance the efficiency of this process, track real-time data, and maintain transparency throughout the operation.

This project not only aims to reduce food waste but also seeks to improve food security for disadvantaged individuals and communities. Through community engagement and leveraging technology, we can create a sustainable model that benefits both the environment and society. By addressing logistical challenges and ensuring proper food handling and distribution, this project hopes to set a precedent for how technology can be used to tackle pressing social issues.

TASK 1: Salesforce developer account creation

Creating Developer Account

Creating a developerorg in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

- a. First name & Last name
- b. Email
- c. Role : Developer
- d. Company : College or Company Name
- e. County : India
- f. Postal Code : pin code
- g. Username : should be a combination of your name and company

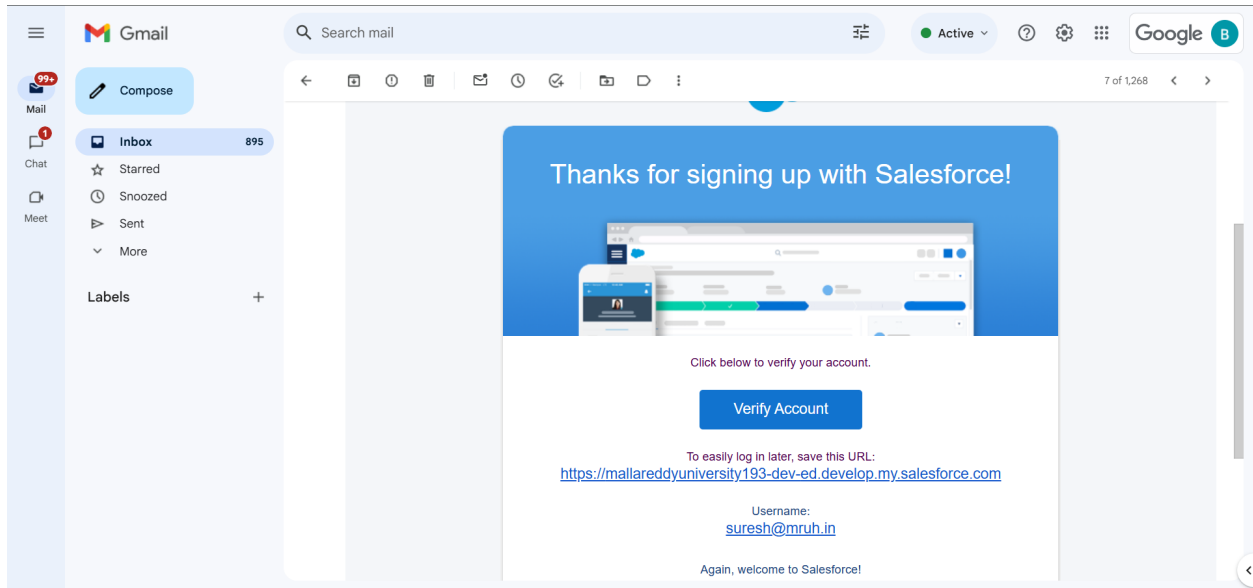

This need not be an actual email id, you can give anything in the format :

[username@organization.com](#)

Click on sign me up after filling these.

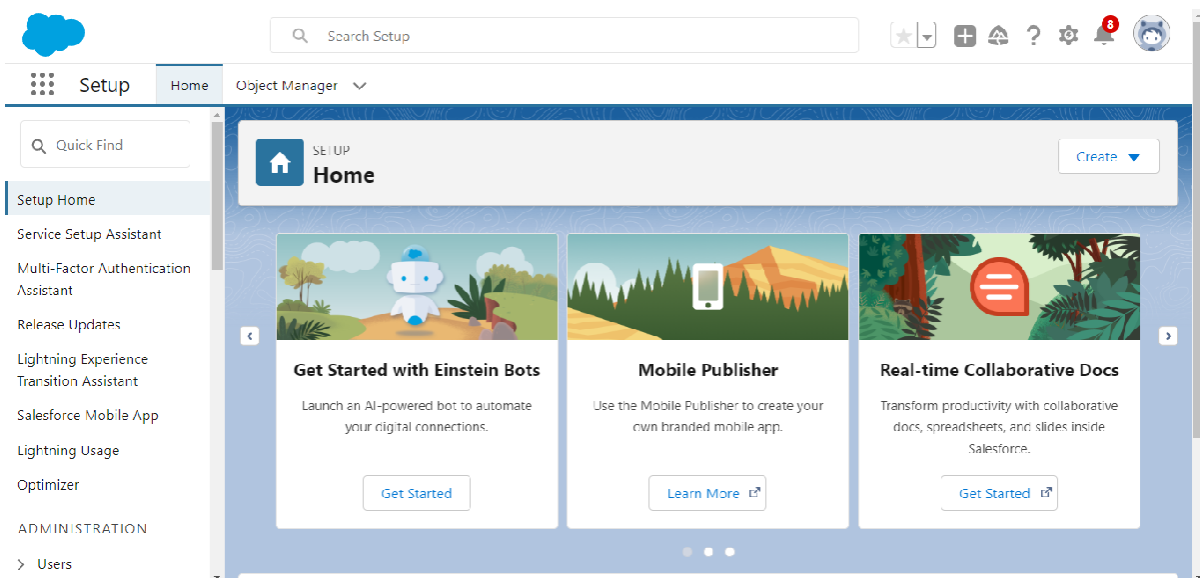

Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

Click on Verify Account

2. Give a password and answer a security question and click on change password.
3. Give a password and answer a security question and click on change password.
4. Then you will be redirected to your Salesforce setup page.

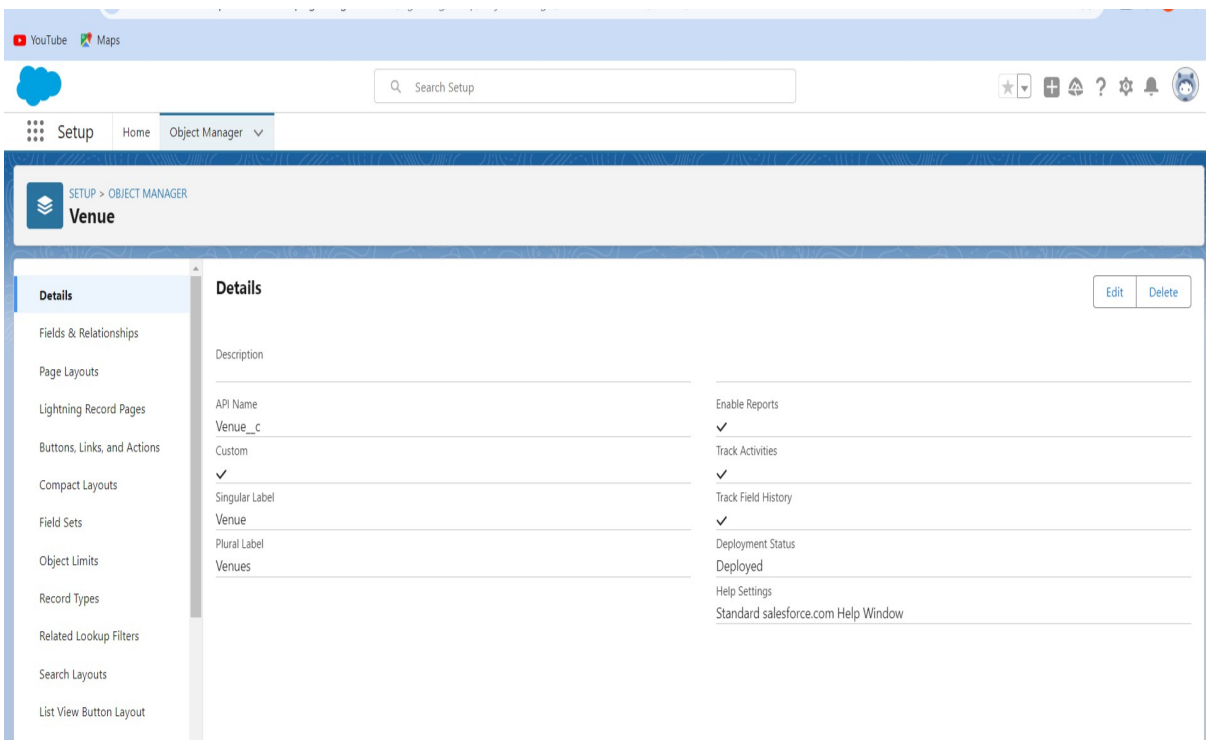

TASK 2: Objects creation

Create Venue Object

To create an object:

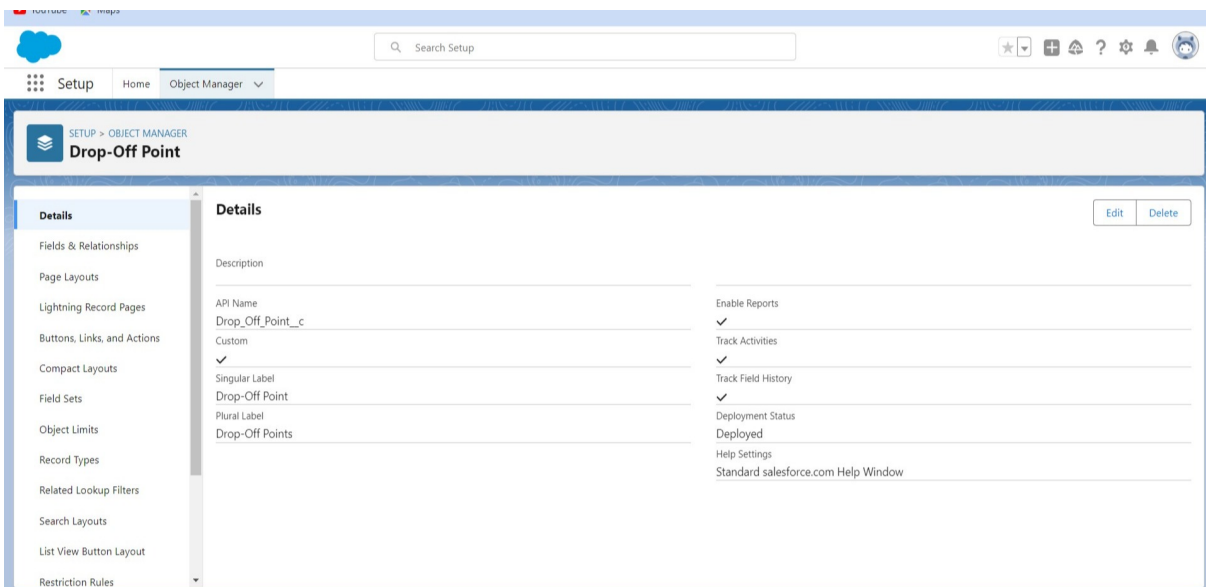

1. From the setup page >> Click on Object Manager >>Click on Create >>Click on Custom Object.
 - a. Enter the label name >> Venue
 - b. Plural label name >>Venues
 - c. Enter RecordName Label and Format
 - Record Name >> Venue Name
 - DataType >> Text
2. Click on Allow reports and Track Field History, Allow Activities.
3. Allow search >> Save.

Create Drop-Off Point Object

To create an object:

1. From the setup page >> Click on Object Manager >>Click on Create >> Click on Custom Object.
 - a. Enter the label name >> Drop-OffPoint
 - b. Plural label name>> Drop-Off Points
 - c. Enter RecordName Label and Format
 - Record Name >> Drop-Off point Name
 - DataType >> Text
2. Clickon Allow reportsand Track Field History,Allow Activities
3. Allow search >> Save.

Create Task Object

To create an object:

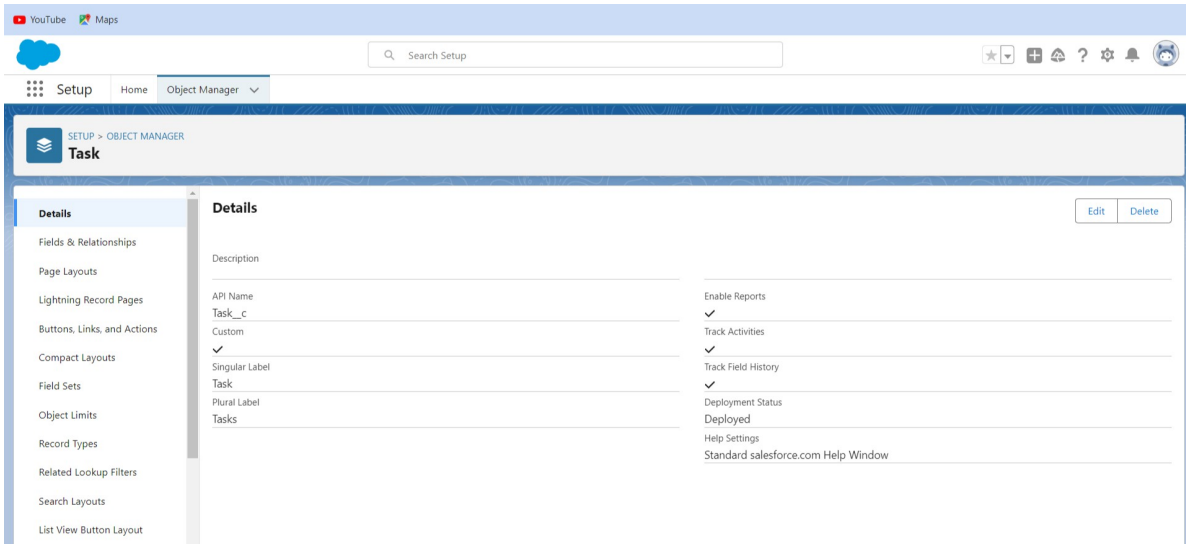

1. From the setup page >> Click on Object Manager >>Click on Create >> Click on Custom Object.
 - a. Enter the label name>> Task
 - b. Plural labelname>> Tasks

c. Enter RecordName Label and Format

- Record Name >> Task Name
- DataType >> Text

2. Click on Allow reports and Track Field History, Allow Activities

3. Allow search >> Save.

Create Volunteer Object

To create an object:

1. From the setup page >> Click on Object Manager>> Click on Create >> Click on Custom Object.
 - a. Enter the label name>> Volunteer
 - b. Plural labelname>> Volunteers
 - c. Enter RecordName Label and Format
 - Record Name >> VolunteerName
 - DataType >> Text
2. Click on Allow reports and Track FieldHistory, Allow Activities
3. Allow search >> Save

Create Execution Details Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
 - a. Enter the label name >> Execution Detail
 - b. Plural label name >> Execution Details
 - c. Enter Record Name Label and Format
 - Record Name >> Execution Detail Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History, Allow Activities
3. Allow search >> Save.

TASK 3: Tabs

What is Tab : A tab is like a user interface that is used to build records for objects and to view the records in the objects.

Creating a Custom Tab

To create a Tab:(Venue)

Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)

1. Select Object(Venue) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .
2. Make sure that the Append tab to users'existing personal customizations is checked.
3. Click save

Creating Remaining Tabs

1. Now create the Tabs for the remaining Objects, they are "Drop-Off Point, Task, Volunteer, Execution Details".
2. Follow the same steps as mentioned in above Activity.

TASK 4: The Lightning App

To create a lightning app page:

1. Go to setup page >> search "app manager" in quick find >> select "app manager" >> click on New lightning App.
2. Fill the app name in app details and branding as follow
App Name : Food Share
Developer Name : This will auto populated

Image : optional (if you want to give any image you can otherwise not mandatory) Primary color hex value : keep this default.
3. Then click Next >> (App option page) Set Navigation Style as Standard Navigation

>> Next.

4. (Utility Items)keep it as default >>Next.

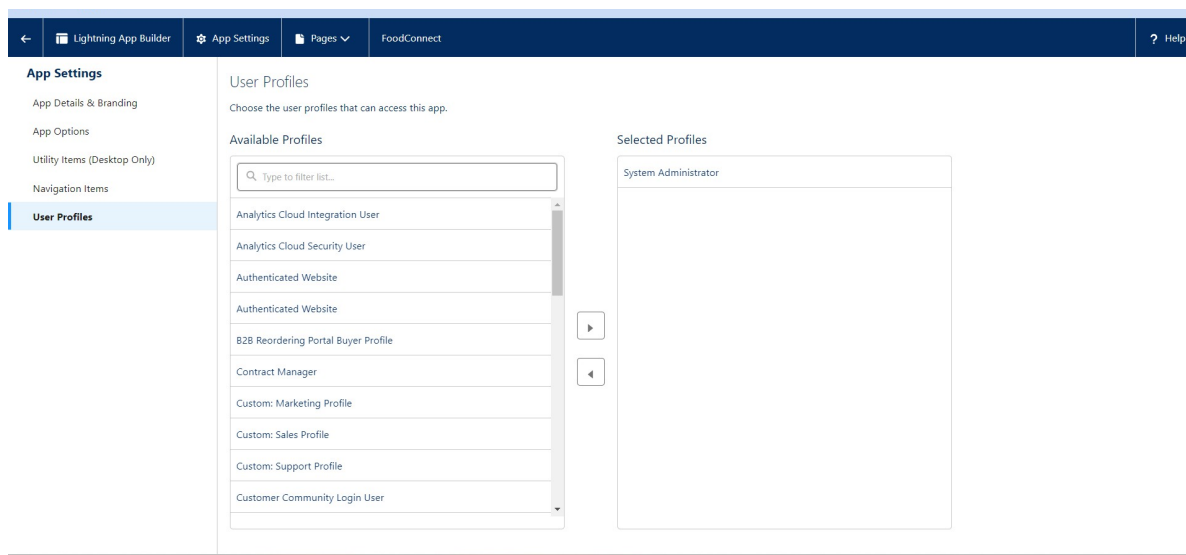

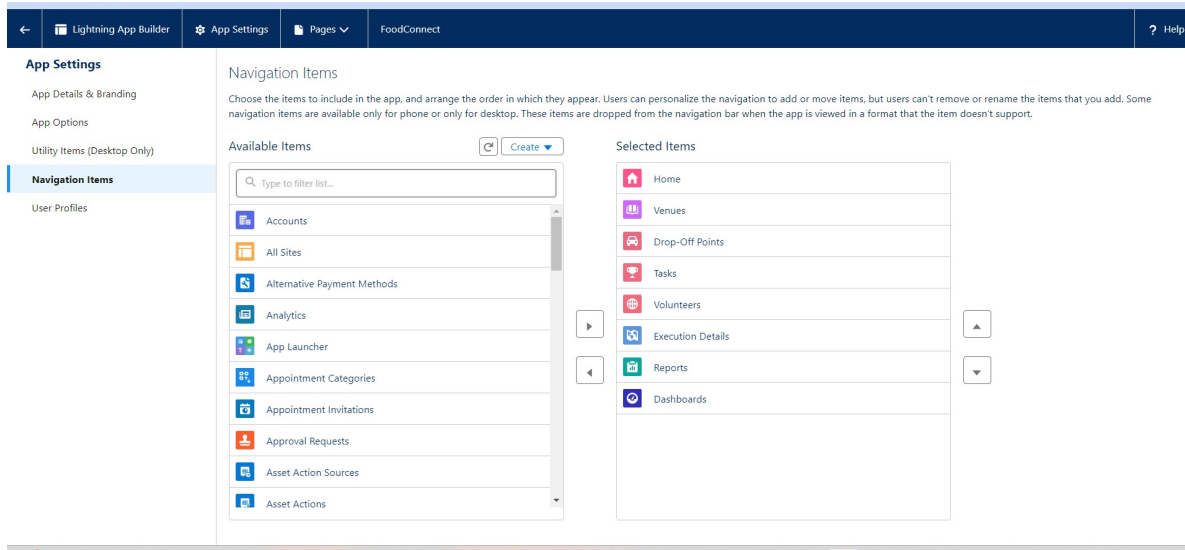

5. To Add Navigation Items:

Search for the item in the (Home, Venue, Drop-Off Point, Task, Volunteer, Execution Details, Reports) from the searchbar and move it usingthe arrow button>> Next >>Next.

6. To Add User Profiles:

Search profiles (Systemadministrator) in the search bar >> click on the arrow button >> save & finish.

TASK 5: Fields creation

Creation of Relationship fields in objects

Creation of Lookup Relationship Field on VolunteerObject :

1. Go to setup >> click on Object Manager >> type object name (Volunteer) in the search bar >> click on the object.

2. Nowclick on "Fields& Relationships" >>New
3. Select Master Detail relationship
4. Select the related object "Drop-Off point" and click next.
5. FieldName : Drop_Off_point
6. Fieldlabel : Auto generated
7. Next>> Next >> Save.

Creation of Master DetailRelationship Field on Execution DetailsObject :

8. Go to setup >> click on Object Manager >>type object name(Execution Details) in the search bar >> click on the object.
9. Nowclick on "Fields& Relationships" >>New
10. Select Master Detail relationship
11. Select the related object "Volunteer" and click next.
12. FieldName : Volunteer
13. Field label : Auto generated
14. Next >>Next >> Save.

Creation of Master DetailRelationship Field on Execution DetailsObject :

15. Go to setup >> click on Object Manager >>type object name(Execution Details) in the search bar >> click on the object.
16. Nowclick on "Fields& Relationships" >>New
17. Select Master Detail relationship
18. Select the related object "Task" and click next.
19. Field Name : Task
20. Fieldlabel : Auto generated
21. Next >>Next >> Save.

Creation of Lookup Relationship Field on Drop-OffPoint Object :

22. Go to setup >> click on Object Manager >>type object name(Task) in the search bar >> click on the object.
23. Nowclick on "Fields& Relationships" >>New
24. Select Lookuprelationship

25. Select the related object "Drop-Off Point" and click next.
26. Field Name : Venue
27. Fieldlabel : Venue__c
28. Next >>Next >> Save.

Creation of Lookup Relationship Field on Task Object :

29. Go to setup>> click on ObjectManager >> type object name(Task) in the search bar >> click on the object.
30. Nowclick on "Fields& Relationships" >>New
31. Select Lookuprelationship
32. Select the related object"Venue" and click next.
33. Field Name : SponsoredBy
34. Field label : Auto generated
35. Next>> Next >> Save.

Creation of Lookup Relationship Field on Task Object :

36. Go to setup>> click on ObjectManager >> type object name(Task) in the search bar >> click on the object.
37. Nowclick on "Fields& Relationships" >>New
38. Select Lookuprelationship
39. Select the related object "Drop-Off point" and click next.
40. Field Name : Drop-Off point
41. Field label : Auto generated
42. Next>> Next >> Save.

Creation of fields for the Venue object

1. Go to setup>> click on Object Manager >>type object name(Venue) in search bar >> click on the object.
2. Now clickon "Fields & Relationships" >>New
3. Select Data type as a "Email"and Click on Next
4. Fillthe Above as following:
 - a. FieldLabel : Contact Email

- b. FieldName : Contact Email
- c. Clickon required check box
- d. Clickon Next >>Next >> Save and new.

To create another field in an object:

5. Go to setup >>click on Object Manager >>type object name(Venue) in search bar >> click on the object.
6. Now clickon "Fields & Relationships" >>New
7. Select Data type as a "Phone"and Click on Next
8. Fillthe Above as following:
 - a. FieldLabel : Contact Phone
 - b. FieldName : Contact Phone
 - c. Clickon required check box
 - d. Clickon Next >>Next >> Save and new.

To create another field in an object:

1. Go to setup >>click on Object Manager >>type object name(Venue) in search bar >>click on the object.
2. Now clickon "Fields & Relationships" >>New
3. Select Data type as a "Geolocation" and Click on Next
4. Fillthe Above as following:
 - a. FieldLabel : Location
 - b. Decimal Places : 4
 - c. FieldName : Location
 - d. Description : Enter the Geolocation of your Venue
 - e. Clickon Next >>Next >> Save and new.

To create another field in an object:

9. Go to setup >> click on Object Manager >> type object name(Venue) in search bar >> click on the object.
10. Now click on "Fields & Relationships" >> New
11. Select Data type as a "Long Text Area" and Click on Next
12. Fill the Above as following:
 - a. FieldLabel : Venue Location
 - b. FieldName : Venue_Location
 - c. Click on Next >> Next >> Save and new.

Creation of fields for the Drop-Off point object

Go to setup >> click on Object Manager >> type object name(Drop-Off point) in search bar >> click on the object.

1. Now click on "Fields & Relationships" >> New
2. Select Data type as a "Geolocation" and Click on Next
3. Fill the Above as following:
 - a. FieldLabel : Location 2
 - b. FieldName : gets auto generated
 - c. Description : Enter the Geolocation of the Drop off Point
 - d. Geolocation Options : select Decimal

- e. Decimal Places : 4
- f. Click on Next >>Next >> Save and new.

To create another field in an object:

1. Go to setup >> click on Object Manager >> type object name (Drop-Off point) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select Data type as a "Formula" and Click on Next
4. Fill the Above as following:
 - a. Field Label : distance calculation
 - b. Field Name : distance_calculation
 - c. Formula Return Type : Number
 - d. Formula Options : DISTANCE(Location__c, Venue__r.Location__c, 'km')
 - e. Click on Next >>Next >> Save and new.

To create another field in an object:

5. Go to setup >> click on Object Manager >> type object name (Drop-Off point) in search bar >> click on the object.
6. Now click on "Fields & Relationships" >> New
7. Select Data type as a "Picklist" and Click on Next
8. Fill the Above as following:
 - a. Field Label : State
 - b. Field Name : State
 - c. Enter values, with each value separated by a new line :
 - Andhra Pradesh
 - Arunachal Pradesh
 - Assam
 - Bihar
 - Chhattisgarh
 - Goa

- Gujarat
 - Haryana
 - Himachal Pradesh
 - Jharkhad
 - Karnataka
 - Kerala
 - Maharashtra
 - Madhya Pradesh
 - Manipur
 - Meghalaya
 - Mizoram
 - Nagaland
 - Odisha
 - Punjab
 - Rajasthan
 - Sikkim
 - Tamil Nadu
 - Tripura
 - Telangana
 - Uttar Pradesh
 - Uttarakhand
 - West Bengal
 - Andaman & Nicobar(UT)
 - Chandigarh (UT)
 - Dadra & Nagar Haveli and Daman & Diu(UT)
 - Delhi [National Capital Territory (NCT)]
 - Jammu & Kashmir (UT)
 - Ladakh (UT)
 - Lakshadweep (UT)
 - Puducherry (UT)
- d. Clickon required check box

- e. Clickon Next >>Next >> Save and new.

To create another fields in an object:

9. Go to setup >>click on ObjectManager >> type object name(Task) in search bar >> click on the object.
10. Now clickon "Fields & Relationships" >>New
11. Select Data type as a "Number"and Click on Next
12. Fill the Above as following:
 - a. FieldLabel : Distance
 - b. FieldName : Distance
 - c. Length : 14
 - d. Decimal Places : 4
 - e. Clickon required check box
 - f. Clickon Next >>Next >> Save and new.

Creation of fields for the Task object

Go to setup>> click on ObjectManager >> type object name(Task) in search bar >> click on the object.

1. Now clickon "Fields & Relationships" >>New
2. Select Data type as a "Auto Number" and Click on Next

3. Fill the Above as following:

- a. FieldLabel : Task ID
- b. Display Format : TASK-{0}
- c. Starting Number : 1
- d. FieldName : gets auto generated
- e. Clickon required check box
- f. Clickon Next >>Next >> Save and new.

To create another fields in an object:

- 1. Go to setup >>click on ObjectManager >> type object name(Task) in search bar >> click on the object.
- 2. Now clickon "Fields & Relationships" >>New
- 3. Select Data type as a "Date"and Click on Next
- 4. Fill the Above as following:
 - a. FieldLabel : Date
 - b. FieldName : Date
 - c. Clickon required check box
 - d. Clickon Next >>Next >> Save and new.

To create another fields in an object:

- 5. Go to setup >>click on ObjectManager >> type object name(Task) in search bar >> click on the object.
- 6. Now clickon "Fields & Relationships" >>New
- 7. Select Data type as a "Picklist (Multi-Select)" and Click on Next
- 8. Fill the Above as following:
 - a. FieldLabel : Food Category
 - b. FieldName : Food Category
 - c. Enter values,with each value separated by a new line :
 - Veg
 - Non-Veg Salad
 - Snack

- d. Click on required check box
- e. Click on Next >>Next >> Save and new.

To create another fields in an object:

9. Go to setup >>click on ObjectManager >> type object name(Task) in search bar >> click on the object.
10. Now click on "Fields & Relationships" >>New
11. Select Data type as a "Number" and Click on Next
12. Fill the Above as following:
 - a. FieldLabel : Number of People Served
 - b. FieldName : Number_of_People_Served
 - c. Click on required check box
 - d. Click on Next >>Next >> Save and new.

To create another fields in an object:

13. Go to setup >>click on ObjectManager >> type object name(Task) in search bar >> click on the object.
14. Now click on "Fields & Relationships" >>New
15. Select Data type as a "Text" and Click on Next
16. Fill the Above as following:
 - a. FieldLabel : Name of the Person
 - b. FieldName : Name_of_the_Person
 - c. Click on Next >>Next >> Save and new.

To create another fields in an object:

17. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
18. Now click on "Fields & Relationships" >>New
19. Select Data type as a "Phone" and Click on Next
20. Fill the Above as following:
 - a. FieldLabel : Phone
 - b. FieldName : Phone

- c. Clickon Next >> Next>> Save and new.

To create another fields in an object:

- 21. Go to setup >> click on ObjectManager >> type object name(Task) in search bar >> click on the object.
- 22. Now clickon "Fields & Relationships" >> New
- 23. Select Data type as a "Pick List" and Click on Next
- 24. Fill the Above as following:
 - a. FieldLabel : Rating
 - b. FieldName : Rating
 - c. Enter values, with each value separated by a new line :
 - 1
 - 2
 - 3
 - 4
 - 5
 - d. Clickon Next >> Next >> Save and new.

To create another fields in an object:

- 25. Go to setup >> click on ObjectManager >> type object name(Task) in search bar >> click on the object.
- 26. Now clickon "Fields & Relationships" >> New
- 27. Select Data type as a "Long Text Area" and Click on Next
- 28. Fill the Above as following:
 - a. FieldLabel : Feedback
 - b. FieldName : Feedback
 - c. Clickon Next >> Next >> Save and new.

Creation of fields for the Volunteerobject

1. Go to setup >>click on Object Manager >>type object name(Volunteer) in search bar >> click on the object.
2. Now clickon “Fields & Relationships” >>New
3. Select Data type as a “Auto Number” and Click on Next
4. Fill the Above as following:
 - a. FieldLabel : Volunteer ID
 - b. FieldName : gets auto generated

- c. Click on required check box
- d. Click on Next >>Next >> Save and new.
- e. Click on Next >>Next >> Save and new.

To create another field in an object:

1. Go to setup >>click on Object Manager >>type object name(Volunteer) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >>New
3. Select Data type as a "Picklist" and Click on Next
4. Fill the Above as following:
 - a. FieldLabel : Gender
 - b. FieldName : Gender
 - c. Enter values,with each value separated by a new line : Female
Male
 - d. Click on Next >>Next >> Save and new.

To create another field in an object:

5. Go to setup >>click on Object Manager >>type object name(Volunteer) in search bar >> click on the object.
6. Now click on "Fields & Relationships" >>New
7. Select Data type as a "Date" and Click on Next
8. Fill the Above as following:
 - a. FieldLabel : Available On
 - b. FieldName : Available On
 - c. Click on required check box
 - d. Click on Next >>Next >> Save and new.

To create another field in an object:

9. Go to setup >>click on Object Manager >>type object name(Volunteer) in search bar >> click on the object.

10. Now click on "Fields & Relationships" >>New
11. Select Data type as a "Number" and Click on Next
12. Fill the Above as following:
 - a. FieldLabel : Age
 - b. FieldName : Age
 - c. Click on required check box
 - d. Click on Next >> Next >> Save and new.

To create another fields in an object:

13. Go to setup >> click on Object Manager >> type object name (Volunteer) in search bar >> click on the object.
14. Now click on "Fields & Relationships" >>New
15. Select Data type as a "Email" and Click on Next
16. Fill the Above as following:
 - a. FieldLabel : Email
 - b. FieldName : Email
 - c. Click on required check box
 - d. Click on Next >> Next >> Save and new.

To create another fields in an object:

17. Go to setup >> click on Object Manager >> type object name (Volunteer) in search bar >> click on the object.
18. Now click on "Fields & Relationships" >>New
19. Select Data type as a "Number" and Click on Next
20. Fill the Above as following:
 - a. FieldLabel : Contact Number
 - b. FieldName : Contact_Number
 - c. Click on required check box
 - d. Click on Next >> Next >> Save and new.

To create another fields in an object:

21. Go to setup >> click on Object Manager >> type object name (Volunteer) in search bar >>

click on the object.

22. Now click on "Fields & Relationships" >>New

23. Select Data type as a "Text Area (Long)" and Click on Next

24. Fill the Above as following:

- a. FieldLabel : Address
- b. FieldName : Address
- c. Click on Next >>Next >> Save and new.

To create another fields in an object:

25. Go to setup >>click on Object Manager >>type object name(Volunteer) in search bar >> click on the object.

26. Now click on "Fields & Relationships" >>New

27. Select Data type as a "Date" and Click on Next

28. Fill the Above as following:

- a. FieldLabel : Date of Birth
- b. FieldName : Date_of_Birth
- c. Click on Next >>Next >> Save and new.

Creation of fields for the ExecutionDetails object

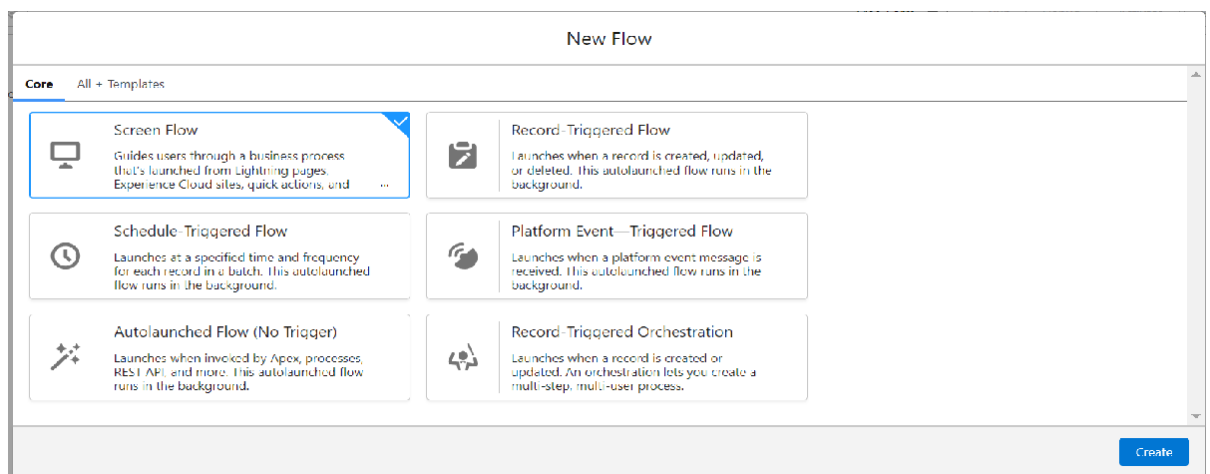

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select Data type as a "Auto Number" and Click on Next
4. Fill the Above as following:
 - a. FieldLabel : Execution ID
 - b. FieldName : gets auto generated
 - c. Click on required check box
 - d. Click on Next >> Next >> Save and new.

TASK 6: FLOWS

Create Flow to createa record in Venue object

1. Go to setup >>type Flow in quick find box >>Click on the Flow and Select the New Flow.
2. Select the Screen flow. Click on create.

3. Click on the '+' icon in between start and end, and click on screenelement.
4. Under the Screen Properties: Label : Venue Details
API Name : Venue_Details

5. Now lets add components in this flow.Click on Text Component and name it as:

Label : Venue Name API Name : Venue_Name

6. Click on Email Component and name it as: Label : Email

API Name : Contact_Email

7. Click on Phone Component and name it as: Label : Phone

API Name : Contact_Phone

8. Click on Text Componentand name it as: Label : Venue Location

API Name : Venue_Location

9. Click on Number Component and name it as: Label : Latitude

API Name : Latitude

10.Click on Number Component and name it as:

Label : longitude API Name : longitude

11.Next click on Done. This would like below

12.Click on the '+' icon in between Venuedetails and end, and clickon create record element.

13.Now label it as

Label : Create VenueRecord API Name : Create_Venue_Record

How Many Records to Create : One

How to Set the Record Fields : Use separate resources, and literal values

Object : Venue

Set Field Values for the Venue: Click on 'Add Field' 5 times Field : Value =

Contact_Email__c : {!Contact_Email.value} Field : Value = Contact_Phone__

c : {!Contact_Phone.value} Field : Value = Name : {!Venue_Name}

Field : Value = Venue_Location__c : {!location}

Field : Value = Location_Latitude__s : {!latitude} Field : Value = Location_

Longitude__s : {!longitude}

14. This would look like:

15. Click on Save as:

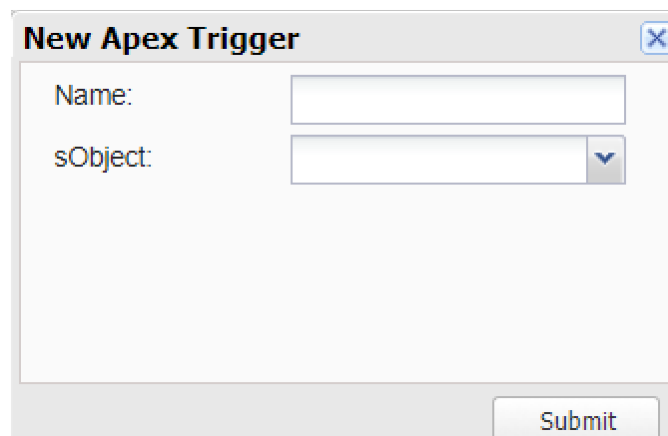

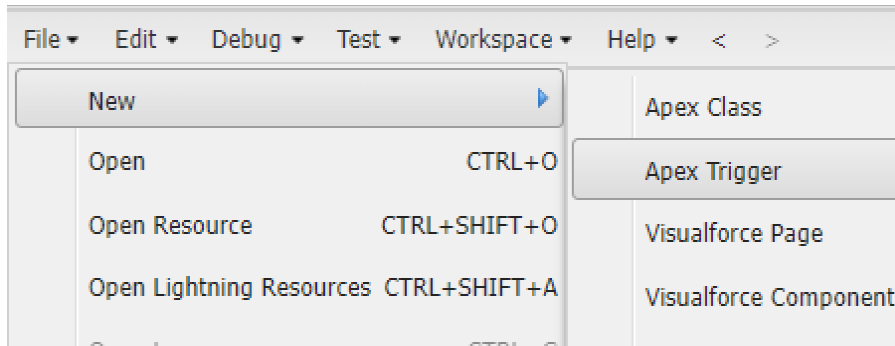

Flow Label : Venue Form Flow API Name : Venue_Form

TASK 7: Trigger

Create a Trigger

1. Log into the trailhead account, navigate to the gear icon in the top right corner.

2. Click on developer console and you will be navigated to a new console window.
3. Click on the File menu in the toolbar, and click on new >> Trigger.
4. Enter the trigger name and the object to be triggered.

A screenshot of the 'New Apex Trigger' dialog box. It has a title bar with a close button. Inside, there are two fields: 'Name:' with a text input box, and 'sObject:' with a dropdown menu. At the bottom right, there is a 'Submit' button.

5. Enter Name : DropOffTrigger sObject: Drop-Off Point
6. Click on Submit.

Trigger Code

(This Trigger is to assign Distance field to the Distance Calculation field. So that we can assign the distance in the sharing rules.)

Code:

```

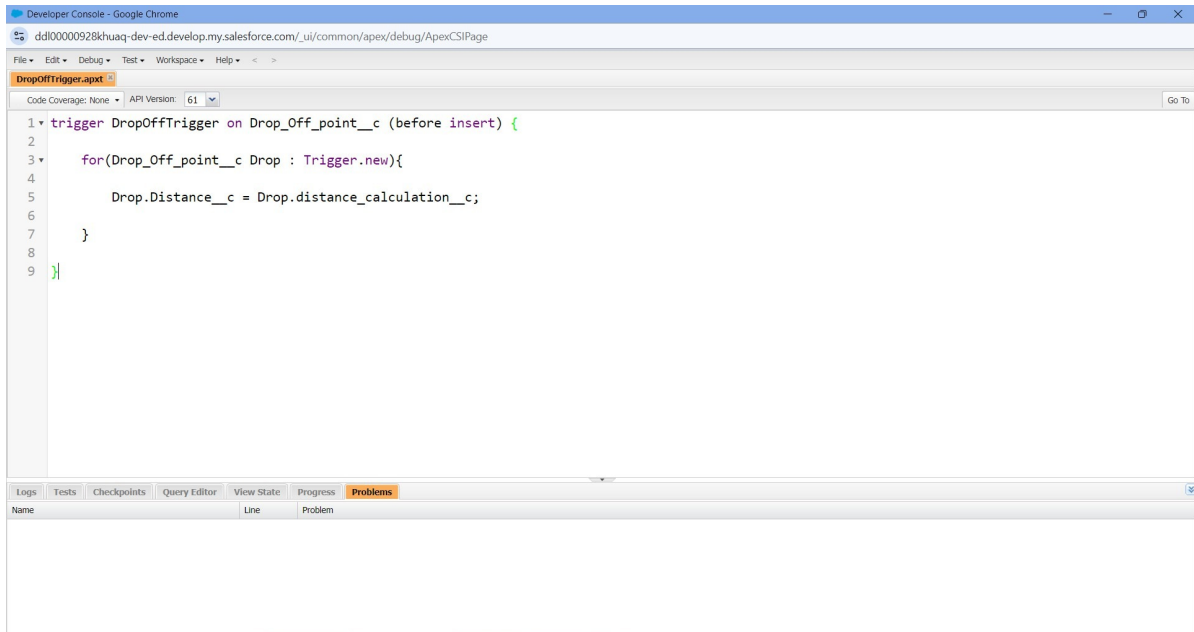

trigger DropOffTrigger on Drop_Off_point_c (before insert){ for(Drop_Off_point_c
    Drop : Trigger.new){

        Drop.Distance__c = Drop.distance_calculation__c;

    }

}

```

TASK 8: Profiles

1. Go to setup page >> type Profiles in Quick Find bar >>click on Profiles>> click on 'S'
2. Click on Clone beside Standard Platform User.
3. Under Clone Profile:
 - Profile Name : NGOs Profile
1. Then click on Save.

TASK 9 : Creation of Users

In our Project we consider them as NGO's

Creation of User1

1. Go to setup page >> type users in Quick Find bar >> click on users >> New user.
2. In General Information give details as: (Note : create users as per your wish NGO's)

First Name : IkshaFoundation Last Name : Iksha_Foundation Alias : iiksh

Email : Give Your Email

Username : ikshafoundation@sb.com (give the username different)

Nickname : Auto Populated

User License : Salesforce Platform Profile : NGOs Profile

Active : Check

3. Click on Save

Creation of User2, User3

Create another Two Users by following steps in Activity - 1 with similar User License and Profile.

Give Different First Name, Last Name based on Different NGO's.

TASK 10:Public Groups

Creation of Public Group1

1. Go to setup page >> type Public Groups in Quick Find bar >> click on Public Groups >> click on New.
2. Under Group Information: Label : Iksha
Group Name : Iksha
Grant Access Using Hierarchies : Check
3. In Search,Select Users.
4. In SelectedMembers Add Iksha Foundation and System Administrator

Creation of Public Group2

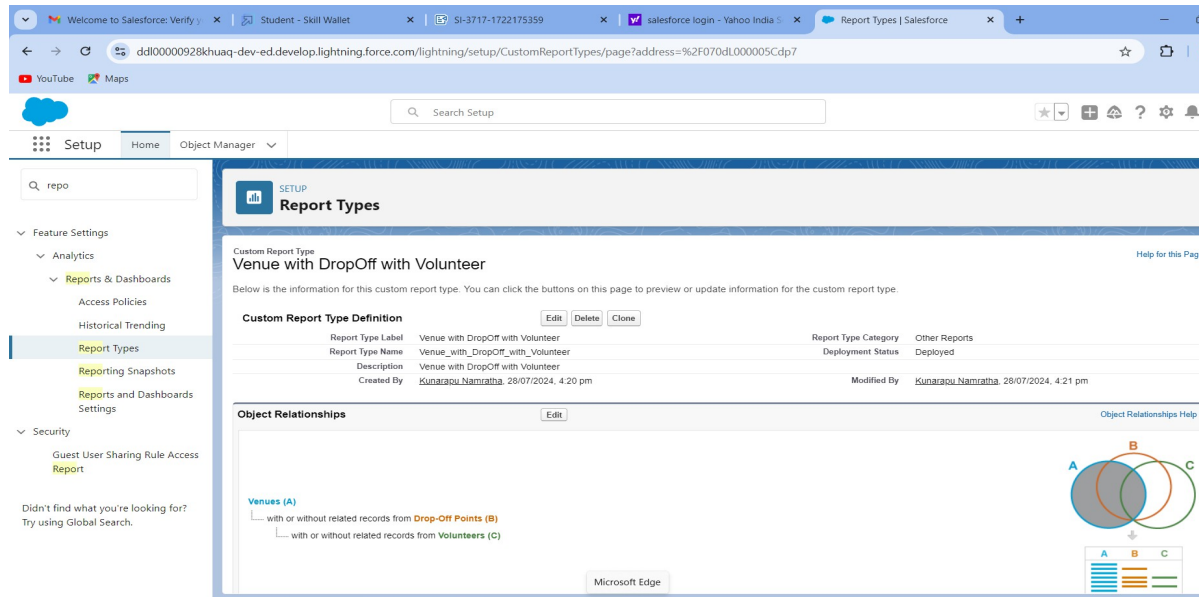

1. By Following Steps in Activity1, Create othertwo Public Groupsfor other two users.
2. After Savingthis would look like this.

TASK 11: Report Types

Creation of Report Types

1. Go to setup page >> type Report Types in Quick Find bar >> click on Report Types >> click on Continue >> Click on New Custom Report Type.
2. In Define the Custom Report Type: Primary Object : Select Venues
Report Type Label : Venue with DropOff with Volunteer
Report Type Name : Venue_with_DropOff_with_Volunteer Description : Venue with DropOff with Volunteer
Store in Category: Select OtherReports Deployment Status : Deployed
3. Click on Next
4. Near Click to relate another Object Select Drop-Off Points.
5. And also select "A" records may or may not have related "B" records.
6. Now again Near Click to relate another Object Select Volunteers.

Now click on Save.

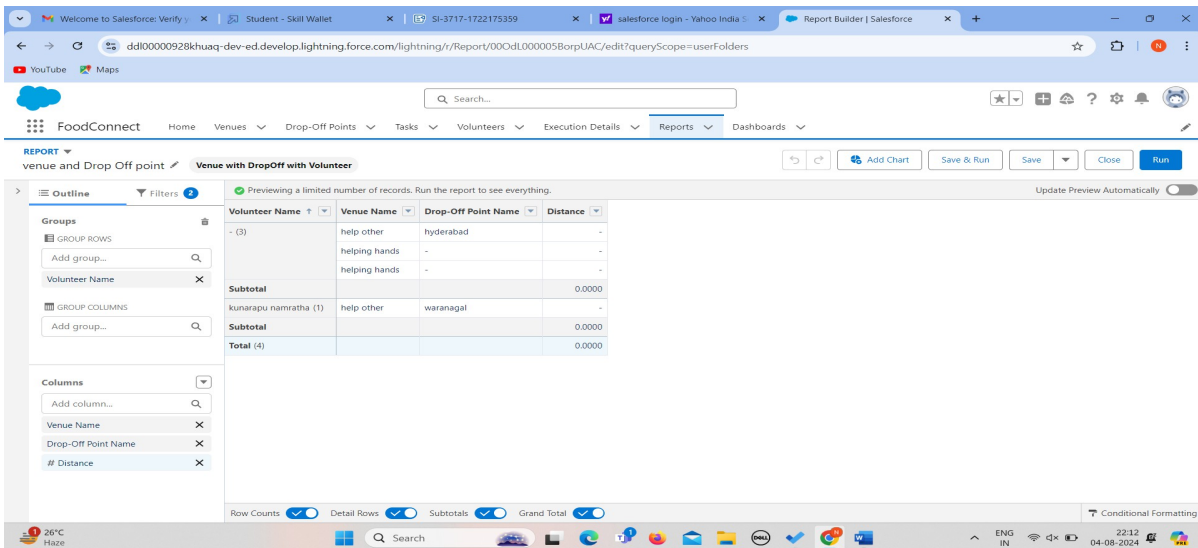

TASK 12:Reports

Creation of Report on Venue with DropOff with Volunteer

1. Go to the app(FoodConnect) >> click on the reportstab
2. Click on New Folder.
Folder Label : Custom Reports
Folder Unique Name : CustomReports
3. Open CustomReports and click on New Report
4. Select ReportType : Venue with DropOffwith Volunteer
5. Thenclick on Start Report.
6. In GROUROWS : Add Volunteer Name
7. In Columns : Add Venue Name, Drop-Offpoint Name, Distance.
8. Now click on Save & Run.
9. GiveLabel as :
- 10.Report Name : venue and Drop Off point

11. Report UniqueName : Auto Populated

12. Click on Select Folder and select CustomReport, then click on Save.

Creation of Report on Volunteers with Execution Details and Tasks

1. Go to the app(FoodConnect) >> click on the reportstab
2. Click on Custom ReportsFolder and click on New Report
3. Select ReportType : Volunteers with Execution Details and Tasks.
4. Then click on Start Report.
5. In GROUP ROWS : Volunteer ID
6. In Columns: Add Volunteer : VolunteerName, Task : Task Name, Execution Detail : Execution Detail Name, Volunteer: Owner Name, Task: Date, Task : Rating.
7. Now click on Save & Run.
8. GiveLabel as :

Conclusion

By leveraging the Salesforce platform, the project successfully established a streamlined and transparent system for managing surplus food donations. Through efficient coordination with volunteers and timely delivery to beneficiaries, the project effectively addressed food insecurity while maximizing the utilization of available resources.
